## About Me

I am a Frontend Engineer all about creating seamless and engaging user interfaces for users, not ignoring the experience users must get on your website. Increasing accessibility for users, using best practices and SEO for faster page load times.

## WORK EXPERIENCE

Dec 2024 - Present  
Partechnologies and Consult  
Frontend Engineer

- Mastery of writing up project documentations
- Received mentorship from senior developers in the industry
- Developed the frontend for a deal sourcing platform, integrated APIS and shared my expertise to make the project a success
- Enhanced my technical knowledge and problem-solving abilities by working through real-world tasks and finding effective solutions.
- Authored a detailed report on my project, documenting the process, challenges, and solutions, further strengthening my ability to communicate technical concepts clearly and effectively.
